

Phase 1 – Business Requirements

Auto Ticket Classification using Flow Designer

Business Requirements

- Automatically classify IT tickets based on the issue description.
- Assign both Category and Subcategory without manual intervention.
- Support dependent choice logic between Category and Subcategory.
- Send an automated email notification to the caller upon ticket creation.
- Store ticket information in a structured and standardized format.
- Ensure easy maintenance and future scalability.

Reference Document Context

- The uploaded reference is titled “Streamlining IT Procurement — Automating Standard Laptop Orders with Flow Designer,” Phase 2 – Requirement Analysis. It identifies functional requirements, user requirements, admin requirements, and non-functional requirements such as reliability, ease of use, maintainability, and clear status visibility. ■filecite■turn0file0■L2-L17■
