

# Phase 2 – Update Set and Project Setup

## Auto Ticket Classification using Flow Designer

### Navigation – Create Update Set

- Go to All menus → Search for Update set.
- Under System Update Sets → Select Local Update Sets.
- Click New on the top right corner.
- Name: Project Update Set.
- State: In progress.
- Application: Global.
- Save the form.
- Under Related links, click Make This My Current Set.
- The created Update Set will appear as Current.

### Project Purpose

- This update set is used to capture the configuration changes made during the project so the developed solution can be moved to another environment.
