

Phase 4 – Category and Subcategory Dependency

Auto Ticket Classification using Flow Designer

Objective

- Implement a dependency relationship between Category and Subcategory so available Subcategory options dynamically change based on the selected Category.

Navigation Steps

- Open the created table form and right-click the Subcategory field.
- Click Configure Dictionary.
- Under Related links, click Advanced view.
- Select the Dependent Field section.
- Enable Use dependent field.
- Set Dependent on to Category.
- Save the form.
- Scroll to the Choice section and add the dependent values.

Dependent Choice Mapping

- Wi-Fi → Network.
- Projector → Hardware.
- Forgot Password → Access.
- Slow Computer → Performance.

Expected Behavior

- Each Subcategory choice is displayed only when its corresponding Category is selected.
