

Phase 7 – Testing and Validation

Auto Ticket Classification using Flow Designer

Test Scenario 1 – Wi-Fi

- Enter one Caller Name.
- Short Description: WiFi not working in library.
- Save the form and reload it.
- Expected classification: Category → Network; Subcategory → WiFi.
- An email is sent to the caller email ID.

Check Email Notification

- Open All menus → Search Emails.
- Under System logs, select Emails.
- Search with the given subject name.
- Open the email record and under Related Links click Preview mail.

Test Scenario 2 – Projector

- Enter one Caller Name.
- Short Description: Projector not turning on.
- Save the form and reload it.
- Expected classification: Category → Hardware; Subcategory → Projector.
- An email is sent to the caller email ID.
